Prof. Hill gave the classes in
Modern History and English Litera-
ture a series of lectures last week.
He is an able instructor and a well

could be made is that he often uses

If There Were But One Edison Instrument

In
All
The
World

It would be the property of the na-
tion, enclosed within granite walls
and guarded as one of its most
priceless possessions. People would
cross continents for the privilege of
hearing its marvelous renditions of
artists' voices or instrumental per-
formances. But because the re-
sources of modern science permit
its production in quantity and its
sale at a reasonable price, you take
it for granted.

As a matter of fact

The NEW EDISON

"The Phonograph With a Reputation"

is one of the greatest achievements of modern science. It RE-
CREATES the artists' voice on instrument with such complete fidelity
that no human ear can distinguish the two renditions: that of the liv-
ing artists from that of the New Edison.

More than 1500 tone tests have been conducted to demonstrate the
truth of this claim. More than 2,000,000 people have heard the living
artists sing in direct comparison with his own voice on the instrument,
and in not one instance could a listener say when it was the artist he
heard and when the New Edison. No other instrument has ever been
subjected to this searching test.

Write us if you want to hear a demonstration.
